Additional Information

To empower innovators to build the future.

Hologram

Stock photography may be used to depict realistic applications of IoT devices.

Photographs should be realistic and feature people in natural contexts.

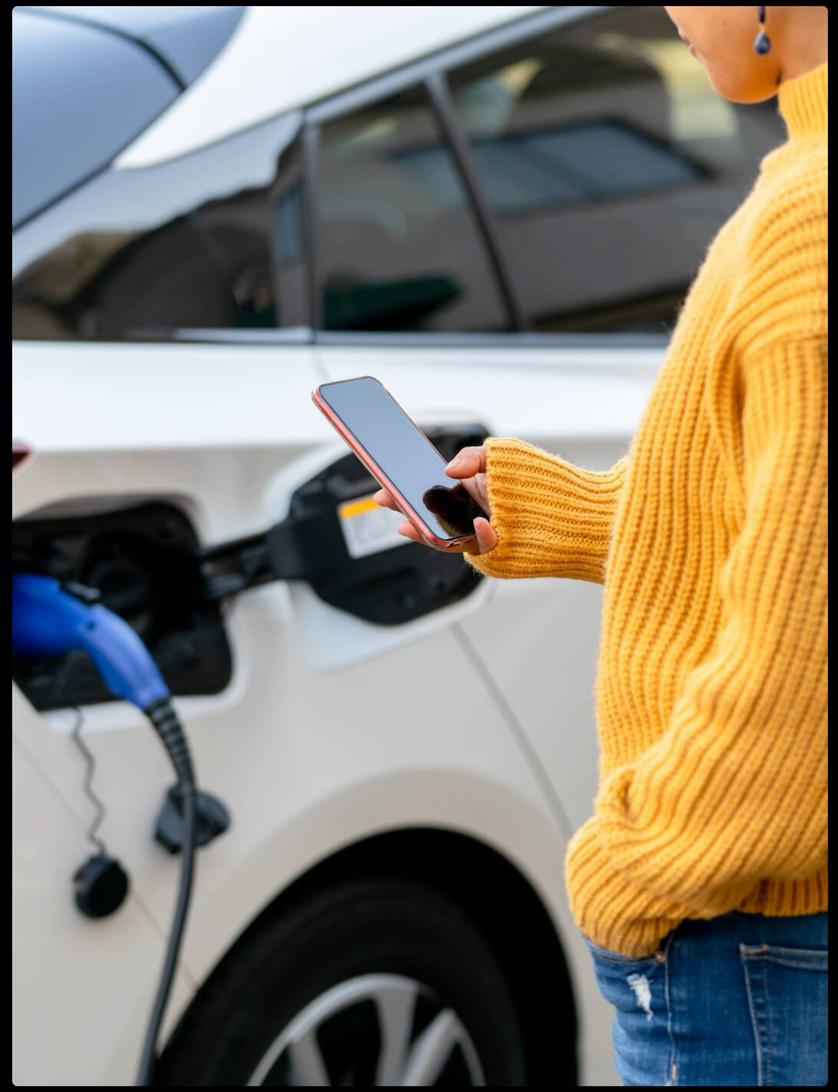
PHOTOS SHOULD NOT:

- Feature “futuristic” tech overlays, lines, glows, etc.
- Have an artistic filter applied
- Have busy compositions with no clear focal point
- Appear behind text

This version of the Hologram Brand Kit was created in January 2025 and is still under construction. Additional guidelines, examples, and brand expressions will be added in future versions.

When IoT is radically simple, progress is limitless.

PHOTOGRAPHY



To provide cellular connectivity for IoT devices and software for the people who manage them.

Dynamic

We are energetic, optimistic, and full of new ideas. We aren’t just keeping up with the ever-changing IoT landscape – we’re defining it.

Roobert Medium is the primary typeface and should be used for all headlines, subheadlines, and body copy.

Roobert is a mono-linear, geometric sans-serif typeface characterized by its clean, horizontal and vertical terminals, and smooth connections on the stems. The typeface as designed by Displaay Type in 2017.

MESSINA SANS MONO

Messina Sans Mono is the secondary typeface, and is used sparingly in the brand. Messina is primarily used for captions, eyebrows, and numerals. Semibold weight should be used, as well as all uppercase.

Dependable

Our customers rely on our technology, and depend on the people behind it. We are consistent, transparent, and committed to helping them succeed.

Outrage Proof ™ Cellular Connectivity That Just Works

HEADING

Your devices, always online.

BODY

With Outage Protection SIMs, we seamlessly switch your devices to the backup core for guaranteed connectivity so that your devices work flawlessly. Put simply, we take away the worry and make sure that it just works.

With Outage Protection SIMs, we seamlessly switch your devices to the backup core for guaranteed connectivity so that your devices work flawlessly. Put simply, we take away the worry and make sure that it just works.

Daring

We defy boundaries. To create a more connected world, we go where others won’t and refuse to let “what if” stop us.

Deliberate

We are intentional, detail-oriented, and strategic. We deeply consider the impact of our products and services for our users, the industry, and the world at large.

Hologram uses the Google Material Design icon library.

Any icon can be used from the Material Design system, as long as these styling guidelines are followed.

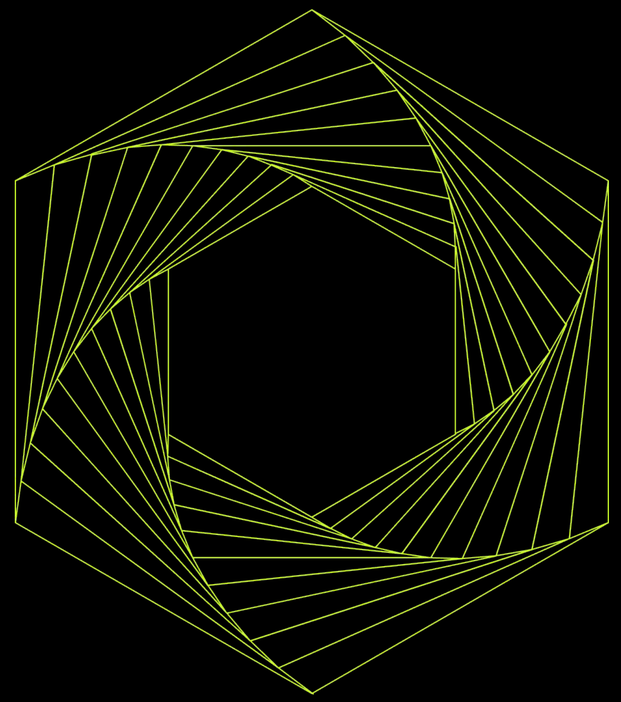
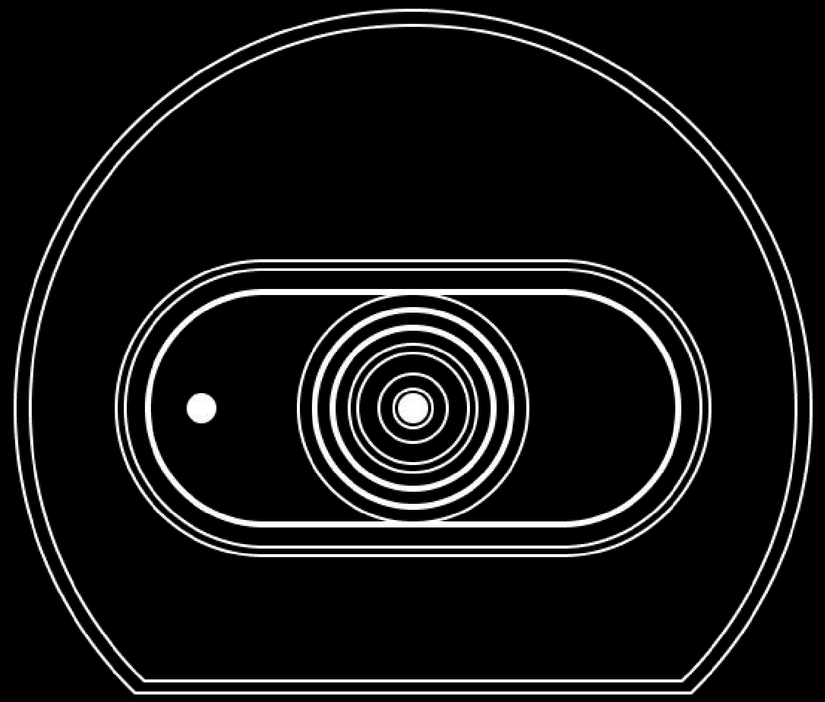
Geometric line art illustrations are used to depict abstract concepts.

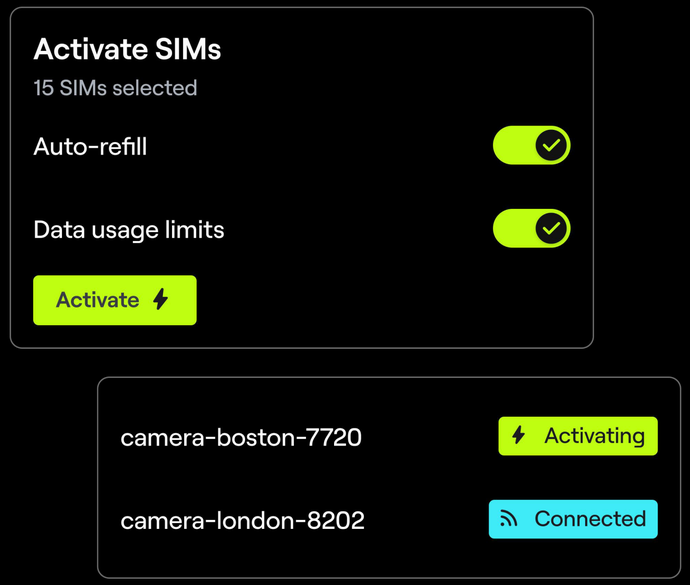
Concept illustrations may be flat, or have a perspective. These illustrations are limited to one color.



Line illustrations are also used to depict physical IoT devices.

Device illustrations must be flat. These illustrations are limited to one color.



Components of the Hologram platform are simplified for clarity in marketing usage.


Platform illustrations follow the brand style rather than the current UI style.
